TREADMILL

MODEL › FMTL8505P
FEATURE › Treadmill shown with workout TV
OPTION › FMTL8255P with basic console

Top View

Also featuring the DRVS™ motor system, the high-performance FreeMotion Treadmill provides users a comfortable running surface that is easy to use, while owners get a low-maintenance, reliable machine.

FEATURES AND BENEFITS

Cushioning › By combining BioStride® urethane deck isolators and the DRVS motor system, users experience additional cushioning as the deck is able to give with every foot strike.

Maintenance-free Belt › 22" x 60" (56 cm x 152 cm), 2-ply belt requires no lubrication for years of smooth, consistent use.

QuickTouch™ Speed › Adjust speed from 1 to 12 MPH by simply touching a QuickTouch button or scrolling in 0.1 MPH increments.

Motor › DRVS™, Direct Rear Velocity System; a self-cooling 5.0 HP high-torque AC speed control motor, positioned in the back of the machine for a smoother running surface and easier maintenance.

Deck › Double coated with phenolic resin on both sides of the deck to last twice as long when flipped during general maintenance.

Incline › Adjust incline from 0 to 15% by scrolling in 0.5% increments.

Serviceability › The unique DRVS system makes routine, preventative maintenance easy because the hood is positioned at the back of the machine.

Lift Motor › AC lift motor provides smooth incline and decline movement and stabilizes the deck.

Heart Rate › Pulse information can be displayed on the console via contact sensors or Polar® compatible wireless telemetry.
